

RETRO Switch

Wireless and batteryless

By turning the knob to the left or the right, this switch can produce wireless signal for control of light (1/0, dimming, LED colour) or shutter. At the same time this switch can simulate Change-over switch (1-0-2). Standard EnOcean PTM200 element is used to send the signal and EnOcean actuator can hear signal in a range of 300m free or 30m through the concrete wall.

Retro switch: no battery, dim Ø80mm, no backbox, to fix on wall with foil, colour white/black
